

CREUSABRO® 8000®

METAL RECYCLING SHREDDER WITH SACKERS

INCREASED LIFETIME OF LINERS

OVER 100% EXTRA WEAR LIFE

Our customer, **SACKERS SCRAP METAL & WASTE RECYCLING**, wanted to know which grade would last the longest in their application: **metal recycling shredder liners**.

They ordered a set of liners in 400 HB and **CREUSABRO® 8000®** to do a comparison. The 400 HB liners lasted just 2 months whilst the **CREUSABRO® 8000®** liners lasted 4 to 5 months, giving 100-150% extra wear life when compared to 400HB.

Not only does the **CREUSABRO® 8000®** work out cheaper when we compare the £'s per hour of the parts but it also reduces the amount of plant downtime for changing parts.
